Ryan Guelzo

Self-motivated and versatile Software Developer with over 6 years of experience in the full stack software development life cycle, consistently delivering clean, efficient, and well-documented solutions that aim to exceed key objectives and enhance user experience. Seeking to leverage strong problem-solving, collaboration, and communication skills in a role with hybrid or remote flexibility. Known for being an innovative, reliable, and tenacious dev.

WORK EXPERIENCE

Praeses

Software Engineer II **04/2026 – 10/2026**

- Design, develop, test, and maintain software applications for federal government mission management systems primarily using Ruby on Rails and GitLab.

Defense Health Agency, Web and Mobile Technology Program, JBLM
(Chenega Agile Realtime Solutions, Semper Valens Solutions, BlueWater Federal Solutions)

Senior Web Application Developer **08/2022 – 12/2025**

- Developed proof of concept VR / XR app for mental health and communication applications for active-duty service members. Worked with the Immersive Tech Team to update and improve application user experience aimed to assist in re-integration of combat veterans. Independently developed data aggregation dashboard to provide single source patient data, streamlining health services for DHA providers. Built and implemented conference apps.

- Worked on Web Team to implement content and functionality updates to the health.mil website including building widgets. Facilitated effort to migrate existing applications to SiteCore, adding web accessibility.

Defense Health Agency, Web and Mobile Technology Program, JBLM
(BlueWater Federal Solutions)

Web Application Developer **06/2020 – 08/2022**

- Rebuilt outdated applications which supported the stress-management, physical, and mental health of active-duty service members using a modern framework while ensuring cross-platform functionality, simplified user experience, and accessibility requirements. Independently developed a Facial Emotion Recognition module as part of the Innovations Team. Built application templates to aid in streamlining processes.

Green River College, Auburn, WA

Full Stack Web Dev Intern / Lead Intern **09/2019 – 06/2020**

- Developed a web application to facilitate scheduling between school faculty and administration staff. Lead Intern (Jan ’20) responsibilities included coordinating tasks, running meetings, troubleshooting assistance, and conducting interviews.

Customer Service Positions **10/2011 – 06/2020**

United States Navy, Silverdale, WA

Submarine Fire Control Technician **09/2006 – 09/2011**

- Maintained and operated the fire control and torpedo weapon delivery systems onboard nuclear submarine USS Henry M. Jackson.
